BÁLINT TÁBORSZKI

Ever since I can remember I was always drawn towards aesthetic beauty as if it was my calling. I did judge books by their cover and I dabbled in all forms of art. It was this passion that guided me when I designed book covers, book layouts or graphics for apparel.

Developing frontends is yet another outlet in which I can put my instinct towards the sublime and beautiful to good use and I find it a genuine joy to be able to sharpen and utilize my skills in that domain.

PORTFOLIO

https://github.com/merewif

WEB APPLICATION FOR WRITERS
https://plotter-f6b18.web.app/

An application to help writers visualize and systemize their character details, their plotlines and worldbuilding ideas.

Plotter is written in **REACT**. The user interface utilizes Material UI components. The application is hosted on Google Firebase. The executable file was created with Electron.

BROWSER-BASED VISUAL NOVEL GAME
https://merewif.github.io/tales-of-strange-aeons/game.html

A browser-based adventure game with achievements based on user choice, developed with **JAVASCRIPT** and **JQUERY**. It is is a progressive web app (**PWA**), installable via mobile browsers. It is fully responsive.

STAR WARS LORETRACKER
https://star-wars-loretracker.vercel.app/

A website to help Star Wars fans keep track of their reading list and watchlist. The Loretracker was developed using **REACT** with Next.js and **TYPESCRIPT**. The UI uses MUI components and Lodash helps in filtering and sorting the data.
